

Corners Beautifully.

Tapered to tuck neatly into corners and under eaves, the OS-10 comes with a clever pivoting bracket that provides endless mounting solutions.

Tough enough for marine applications and beach-front living, Exceeds military anti-corrosion specs (MIL-STD-883D).

ElastoDynamic™ Hybrid Dome Tweeter
Impervious to moisture, Niles' unique tweeter design offers extended frequency response with stunning detail and clarity.

Niles' speaker engineers are driven to design the very best. The result is *unparalleled* performance—sonically, visually, and functionally. The Niles OS-10 Indoor/Outdoor Loudspeaker will exceed all of your expectations.

Sonically. The OS-10 handily outperforms many traditional bookshelf speakers. Much of its superb character comes from its unique tweeter design. Constructed from a composite matrix of elastomers and natural fiber substrates, the ElastoDynamic™ tweeter yields extended frequency response with stunning detail and clarity. But to be a great speaker, you need great bass. Here the OS-10 shows its true horsepower thanks to its injection-molded, polypropylene woofer cone, supple butyl-rubber surround, and powerful magnet structure.

Visually. The OS-10's aerodynamic shape speaks for itself. But what may not be readily apparent speaks just as loudly. The OS-10's tapered enclosure tucks neatly into corners or under eaves,

complementing any decor—inside or out. Its clever pivoting bracket (standard equipment on the OS-10) gives you endless mounting solutions. Available in white or black, either finish is paintable for a truly custom look.

Functionally. We don't take the term "weather-proof" lightly. The OS-10 is designed to withstand extreme climates—from Minneapolis to Miami. Its rugged, non-resonant cabinet is totally sealed (insects or moisture can't creep in) and will not fade under the sun's rays. The grills and brackets are aluminum; the connectors are gold-plated; all the hardware is brass or stainless steel—this

speaker will not rust! And Niles guarantees it for two years—that's twice as long as most manufacturers.
